SKIN CARE

“Combination systemic education”

21C beauty line's education system combines K-Beauty Skin care with German medical. Many Korean women invest a lot of time and money on their skin. The Korean skin care market has grown incredibly large, and people around the world are interested in make-up that makes skin more beautiful. 21C Beauty Line skin care curriculum is designed for beginners to become experts by learning from experts. We have professional curriculums from the theoretical knowledge to the skilled manual technique and the use of machines. In addition, 21C Beauty Line launched the 'bdr' medical system products in Korea which is designed by German doctor.. Special management of skin scar can be performed for the damaged spot within a short amount of time which will satisfy customers who want to see results immediately. You can learn the theory, and the connection between techniques and business through 21C Beauty Line's program.
